CTT Systems receives Cair™ order for another BBJ 777-300 VIP aircraft

Nyköping 4th September, 2015, – CTT SYSTEMS (“CTT”), the market leader of anti-condensation systems for commercial aircraft and the dominating provider of humidification products for VIP aircraft and the pioneer for cockpit, crew rest and cabin humidification, today announces an order of the Cair™ System for one Boeing BBJ 777-300 VIP aircraft to be installed during autumn 2016.

“CTT is very pleased to receive another order of the Cair™ System for the BBJ 777-300 aircraft. This is our fifth Boeing 777 VIP completion with the Cair™ System. Securing this order for another prestigious VIP completion confirms our strong market position in the VIP segment, says Peter Landquist, Vice President Sales & Marketing of CTT Systems.

With this order, CTT has received 79 Cair™ VIP orders in total for Airbus ACJ/Boeing Business Jet.

Cair™ is focused on the passengers' health and comfort by providing humidification of the extremely dry aircraft cabins without causing condensation. Cair™ gives a pleasant relative humidity of around 20%, compared to 3-5% without, for the passengers, thereby reducing dry air related problems (e.g. fatigue, jet-lag, red eyes, dry skin, spread of virus diseases).

The Cair™ system is based on evaporative cooling technology and uses a method that effectively precludes the transfer of bacteria within the aircraft. The dual-purpose system increases humidity for greater comfort and incorporates the Zonal Drying™ System to counter condensation problems.

About CTT SYSTEMS

CTT's Zonal Drying™ System is basic equipment on all Boeing 787 “Dreamliner” aircraft and the humidifiers are standard in all crew rest compartment fitted Dreamliner aircraft and optional for flight deck. The flight deck humidifier is optional on the A350XWB aircraft, the crew rest compartments humidifiers are optional on both A380/A350XWB and the Zonal Drying™ and Cair™ systems are optional on the A350XWB aircraft.
