CTT Systems AB receives order from AERIA Luxury Interiors on Cair™ system for one BBJ1 VIP aircraft

AERIA Luxury Interiors based in San Antonio, Texas, has ordered CTT Cair™ System to be installed in one Boeing BBJ1 VIP aircraft. The installation will be performed during winter 2014/2015.

"We are very pleased to work with CTT for our new outfitting project on a VIP BBJ1 aircraft. This is the first Cair™ system we have installed in a BBJ1 VIP aircraft. We are thoroughly convinced of the added value of the Cair™ system for AERIA Luxury Interiors customers" says Kory Fosheim, Program Manager of AERIA Luxury Interiors."

"This is the first order we have won from AERIA Luxury Interiors and we are delighted to work with them on this new aircraft and prestigious VIP project" says Peter Landquist, Vice President Sales & Marketing of CTT Systems.

Cair™ is focused on the passengers' health and comfort by providing humidification of the extremely dry aircraft cabins without causing condensation. Cair™ gives a pleasant relative humidity of around 20%, compared to 3-5% without, for the passengers, thereby reducing dry air related problems (e.g. fatigue, jet-lag, red eyes, dry skin, spread of virus diseases).

The Cair™ system is based on evaporative cooling technology and uses a method that effectively precludes the transfer of bacteria within the aircraft. The dual-purpose system increases humidity for greater comfort and incorporates the Zonal Drying™ System to counter condensation problems.

About CTT SYSTEMS

CTT's Zonal Drying™ System has been selected as basic equipment for the new B787 "Dreamliner" and CTT's humidifiers are options in crew rest compartments and on the flight deck. The A380 offers CTT's humidifiers as option in crew rest compartments. CTT will also supply the Zonal Drying™ system and the Cair™ system for the A350 aircraft, as options.

CTT's products Zonal Drying™, Cair™, Flight Deck and Crew Humidifier are standard or optional equipment on Boeing B787, Airbus A350 and A380. CTT has today more than 500 systems installed in more than 30 airlines worldwide. CTT has now 21 years of operating experience on the Zonal Drying™ system plus 15 years on Cair™ and Crew Humidifier systems. IATAs report on fuel-saving measures is now including Zonal Drying™ as one of the few available fuel-saving systems for retrofitting.
