## CTT Systems receives order on Zonal Drying™ for two Boeing 737-800

**Nyköping October 19, 2015, – CTT SYSTEMS (“CTT”), the market leader of anti-condensation systems for commercial aircraft and the dominating provider of humidification products for cockpit, crew rest and cabin areas, today announces Zonal Drying System order for two Boeing 737-800 aircraft.**

The Zonal Drying anti-condensation system will be factory installed by Boeing. Hereby the airline prevents that its operational costs increases during operations due to excess weight from accumulation of condensate water. Such weight increases fuel burn and emissions. Further, the airline benefits from other savings such as reduced failure rate of electrical components and replacement of blankets.

“This is a repeat order which is a great recognition from an airline valuing the total benefits of our anti-condensation system,” said Peter Landquist, VP Sales & Marketing CTT Systems AB. “The demand for line-fitted installation of our anti-condensation equipment is growing as more airlines want to master the root-cause of moisture problems from the very first day when a new aircraft enter into operations”.

The Zonal Drying™ Anti-Condensation System generates the following advantages:

- Lower fuel burn and CO2/NOX emissions from excess weight reduction of 200-300kg of accumulated condensate water in B737/A320 aircraft;
- Higher operational reliability from significant lowered moisture related faults in electrical equipment (reduced Out-Of-Service time)
- Lower attrition of replacing insulation blankets

### About CTT SYSTEMS

CTT Systems is specialized in providing products for humidity control in the aircraft. CTT products include anti-condensation systems for mastering moisture problems in the aircraft and humidifiers for in-flight comfort and wellbeing for crew and passengers. CTT products are offered for retrofit installation and line-fit for A380, A350XWB and Boeing 787. The crew humidifier is standard in all crew rest compartment fitted Boeing 787 aircraft and optional in the crew rest compartment on A380 and A350XWB program. The flight deck humidifier is optional on both the Airbus A350XWB and Boeing 787 aircraft. The Airbus A350XWB is first to offer Cair™ humidification as SFE for First and Business Class (Zone1-3). The Zonal Drying™ anti-condensation system is basic equipment in all Boeing 787 aircraft and optional (as Buyer-Furnished-Equipment) for the Boeing 737NG. Also visit: [www.ctt.se](http://www.ctt.se)
