

Press Release

CTT Systems AB receives an order, from Associated Air Center on the Cair™ System for one VIP A330-200 aircraft.

Nyköping, Sweden, June 12, 2012, – Associated Air Center (AAC) in Dallas, USA has ordered the CTT Cair™ System to be installed during 2013 in one VIP A330-200 Airbus aircraft.

“Our clients are among the world’s most prominent and distinguished, therefore our completions projects must incorporate the finest in in-flight cabin comfort systems,” said Patricio Altuna, Executive Vice President, Sales & Marketing. “Using CTT’s, Cair™ System supports this objective.”

This is the fourth Cair™ System order from Associated Air Center. Earlier AAC has installed the Cair™ system in a B767-200, an A319 and one BBJ1 aircraft. We are very pleased and proud that AAC also selected CTT to provide the Cair™ system for their VIP A330-200 outfitting contract says Peter Landquist, Vice President Sales & Marketing of CTT Systems.

Cair™ is focused on the passengers’ health and comfort by providing humidification of the extremely dry aircraft cabins without causing condensation. Cair™ gives a pleasant relative humidity of around 20%, compared to 3-5% without, for the passengers, thereby reducing dry air related problems (e.g. fatigue, jet-lag, red eyes, dry skin, spread of virus diseases).

The Cair™ system is based on evaporative cooling technology and uses a method that effectively precludes the transfer of bacteria within the aircraft. The dual-purpose system increases humidity for greater comfort and incorporates the Zonal Drying™ System to counter condensation problems.

CTT’s Zonal Drying™ System has been selected as basic equipment for the new B787 “Dreamliner” and CTT’s humidifiers are options in crew rest compartments and on flight deck. The A380 offers CTT’s humidifiers as option in crew rest compartments. CTT will also supply the Zonal Drying™ system and the Cair™ system for the A350 aircraft, as options.

Standard Aero’s Associated Air Center provides world-class program management and ODA certification authority to keep airplane programs on schedule and provides industry-leading experience and warranty support after delivery. The company’s vertically-integrated, state of the art facility employs the most advanced engineering in the industry along with operational excellence and superior customer service from start to finish.
