

## Press Release

### **CTT Systems AB receives an order from Airbus Corporate Jet Centre for its Cair™ system on two more VIP A319 aircraft**

**Nyköping, Sweden, November 9, 2011**, – Airbus Corporate Jet Centre (ACJC), the specialist in Airbus Corporate Jet VIP cabin completion and associated services based in Toulouse France, has ordered the CTT Cair™ System to be installed in two Airbus VIP A319 aircraft. The systems will be delivered during the spring 2012.

“Airbus Corporate Jet Centre is very pleased to be working again with CTT. We had an excellent collaboration on previous projects which was a driving factor for choosing them again. We look forward to working together on these new projects”, says Bruno Cousin, Airbus Corporate Jet Centre Head of Procurement.

“This is the fourth and fifth A319/320 VIP aircraft that we have equipped with our Cair™ System for Airbus Corporate Jet Centre. We are proud to be one of Airbus Corporate Jet Centre’s suppliers” says Peter Landquist, Vice President Sales, Marketing & Customer Support of CTT Systems.” The VIP market is at the moment very active and we see a lot of interest in our product” continues Peter Landquist.

Cair™ is focused on the passengers’ health and comfort by providing humidification of the extremely dry aircraft cabins without condensation. Cair™ gives a pleasant relative humidity of 25%, compared to 3-5% without, for the passengers, thereby reducing dry air related problems (e.g. fatigue, jet-lag, red eyes, dry skin, spread of virus diseases).

The Cair™ system is based on evaporative cooling technology and uses a method that effectively precludes the transfer of bacteria within the aircraft. The dual-purpose system increases humidity for greater comfort and incorporates the Zonal Drying™ System to counter condensation problems.

CTT’s Zonal Drying™ System has been selected as basic equipment for the new B787 “Dreamliner” and CTT’s humidifiers are options in crew rest compartments and on flight deck. The A380 offers CTT’s humidifiers as option in crew rest compartments. CTT will also supply the Zonal Drying™ system and the Cair™ system for the A350 aircraft, as options.

CTT's products Zonal Drying™, Cair™, Flight Deck and Crew Humidifier are standard or optional equipment on Boeing B787, Airbus A350 and A380. CTT has today more than 400 systems installed in more than 30 airlines worldwide. CTT has now 17 years of operating experience on the Zonal Drying™ system plus 11 years on Cair™ and Crew Humidifier systems. IATAs report on fuel-saving measures is now including Zonal Drying™ as one of the few available fuel-saving systems for retrofitting.
