

Press Release

CTT Systems AB receives an additional order from Airbus Corporate Jet Centre on the Cair™ system for one VIP A319 aircraft

Nyköping, Sweden, February 04, 2008, – Airbus Corporate Jet Centre based in Toulouse France, has ordered an additional CTT Cair™ System to be installed in one Airbus VIP A319 aircraft. The installation will be performed during spring/summer 2008.

Cair™ is focused on the passengers' health and comfort by providing humidification of the extremely dry aircraft cabins without condensation. Cair™ gives a pleasant relative humidity of 25%, compared to 3-5% without, for the passengers, thereby reducing dry air related problems (e.g. fatigue, jet-lag, red eyes, dry skin, spread of virus diseases).

“Airbus Corporate Jet Centre is a major and modern completion center for the A319/A320 VIP aircraft and this second order for our Cair™ System, within a year, confirms the high interest in our product from our customers” says Ulf Liljenberg, Vice President Sales & Marketing of CTT Systems.” The VIP market is at the moment very active and we are once again proud to be working together with Airbus Corporate Jet Centre on a VIP aircraft project and hopefully more to come” continues Ulf Liljenberg.

The Cair™ system is based on evaporative cooling technology. Besides being extremely energy efficient, Cair™ uses a method that effectively precludes the transfer of bacteria within the aircraft. The dual-purpose system increases humidity for greater comfort and incorporates the Zonal Drying™ System to counter condensation problems.

CTT's Zonal Drying™ System has been selected as standard for the new B787 “Dreamliner” and CTT's humidifiers are options in crew rest compartments and on flight deck. The A380 offers CTT's humidifiers as option in crew rest compartments.

CTT provides systems for humidity control in aircraft. CTT Systems' offers the Zonal Drying™ System, and the Cair™ System. The Zonal Drying™ System eliminates condensation on the aircraft structure and is installed in many aircraft in use today. The Cair™ System provides humidification of the extremely dry first and business class cabins without condensation in long haul aircraft. CTT's Customers include Boeing, Airbus and many airlines, along with partnerships with Lufthansa Technik. CTT Systems AB is located in Nyköping, Sweden and listed on the Stockholm stock exchange.
