CTT Systems AB receives order from AMAC Aerospace on the Cair™ system for one VIP B777-200 aircraft

Nyköping, Sweden, July 14, 2010, – AMAC AEROSPACE (SWITZERLAND) AG has ordered the CTT Cair™ System to be installed in one VIP B777-200 aircraft. The installation will be performed during 2011.

Cair™ is focused on the passengers' health and comfort by providing humidification of the extremely dry aircraft cabins without causing condensation. Cair™ gives a pleasant relative humidity of around 20-25% in the humidified zones, compared to 3-5% without, thereby reducing dry air related problems (e.g. fatigue, jet-lag, red eyes, dry skin, spread of virus diseases).

“AMAC Aerospace is very pleased to be working again with CTT. We had a very strong collaboration on a previous project which was a driving factor for choosing them again. We look forward to working together on this new exciting project”, says Tracey Hawthorne-Kurz Director Purchasing & Logistics at AMAC Aerospace.

“We are very pleased to receive this new order from AMAC Aerospace being the second from the company and we are especially excited receiving the order for a B777 VIP aircraft as it is the first order for us on that aircraft type”, says Ulf Liljenberg, Vice President Sales & Marketing of CTT Systems.” We strongly believe the B777 will be a very popular aircraft in the VIP sector and hope for more orders to come. This also means we will be able to offer the system to B777 airliners”, continues Ulf Liljenberg.

The Cair™ system is based on evaporative cooling technology and uses a method that effectively precludes the transfer of bacteria within the aircraft. The dual-purpose system increases humidity for greater comfort and incorporates the Zonal Drying™ System to counter condensation problems.

CTT's Zonal Drying™ System has been selected as basic equipment for the new B787 “Dreamliner” and CTT's humidifiers are options in crew rest compartments and on flight deck. The A380 offers CTT's humidifiers as option in crew rest compartments. CTT will also supply the Zonal Drying™ system and the Cair™ system for the A350 aircraft, as options.
