

Press Release

CTT Systems AB receives an order from a VIP operator on the Cair™ system for one VIP B777 aircraft

Nyköping, March 18 2011, – A VIP aircraft operator has ordered a CTT Cair™ System to be installed, during fall 2011, in one Boeing VIP B777 aircraft.

Cair™ is focused on the passengers' health and comfort by providing humidification of the extremely dry aircraft cabins without causing condensation. Cair™ gives a pleasant relative humidity of around 20%, compared to 3-5% without, for the passengers, thereby reducing dry air related problems (e.g. fatigue, jet-lag, red eyes, dry skin, spread of virus diseases).

“We are very pleased and honoured to receive this order for a retrofit B777 Cair™ system directly from a VIP aircraft operator” says Ulf Liljenberg, Vice President Sales & Marketing of CTT Systems.” This order further confirms the currently very strong VIP market and also the increased interest in the B777 as a VIP aircraft” continues Ulf Liljenberg.

The Cair™ system is based on evaporative cooling technology and uses a method that The Cair™ system is based on evaporative cooling technology and uses a method that effectively precludes the transfer of bacteria within the aircraft. The dual-purpose system increases humidity for greater comfort and incorporates the Zonal Drying™ System to counter condensation problems.

CTT's Zonal Drying™ System has been selected as basic equipment for the new B787 “Dreamliner” and CTT's humidifiers are options in crew rest compartments and on flight deck. The A380 offers CTT's humidifiers as option in crew rest compartments. CTT will also supply the Zonal Drying™ system and the Cair™ system for the A350 aircraft, as options.

CTT's products Zonal Drying™, Cair™, Flight Deck and Crew Humidifier are standard or optional equipment on Boeing B787, Airbus A350 and A380. CTT has today more than 400 systems installed in more than 30 airlines worldwide. CTT has now 16 years of operating experience on the Zonal Drying™ system plus 10 years on Cair™ and Crew Humidifier systems. IATAs report on fuel-saving measures is now including Zonal Drying™ as one of the few available fuel-saving systems for retrofitting.
