

Press Release

CTT Systems AB receives an order, during the Dubai Air Show, from Comlux Completion on the Cair™ system for one VIP A320 aircraft

Dubai, November 16, 2009, – Comlux Completion based in Indianapolis USA, has ordered a CTT Cair™ System to be installed, during spring 2010, in one Airbus VIP A320 aircraft. Comlux Completions is a major completion center offering top quality cabin outfitting and associated services.

Cair™ is focused on the passengers' health and comfort by providing humidification of the extremely dry aircraft cabins without condensation. Cair™ gives a pleasant relative humidity of 25%, compared to 3-5% without, for the passengers, thereby reducing dry air related problems (e.g. fatigue, jet-lag, red eyes, dry skin, spread of virus diseases).

"We are really pleased to install the Cair™ system on the A320 Prestige that we will complete next year. The Cair™ system provides enhanced cabin comfort and this is a must for Comlux Vip clientele." says David Edinger, CEO of Comlux Completion USA."

"This is the first order for our Cair™ system from Comlux Completions" says Ulf Liljenberg, Vice President Sales & Marketing of CTT Systems." We are very proud to get this order from Comlux and are excited to work together on this and potential future projects. The market for large VIP aircraft is doing fairly well considering the global recession and customers within this segment are more and more interested in adding our system to their VIP aircraft to increase their comfort and wellbeing during flights" continues Ulf Liljenberg.

The Cair™ system is based on evaporative cooling technology and uses a method that effectively precludes the transfer of bacteria within the aircraft. The dual-purpose system increases humidity for greater comfort and incorporates the Zonal Drying™ System to counter condensation problems.

CTT's Zonal Drying™ System has been selected as basic equipment for the new B787 "Dreamliner" and CTT's humidifiers are options in crew rest compartments and on flight deck. The A380 offers CTT's humidifiers as option in crew rest compartments. CTT will also supply the Zonal Drying™ system and the Cair™ system for the A350 aircraft, as options.

During November 15- November 19 CTT is displaying its products at the Dubai Air show. Please visit CTT in booth W473.
