

Press Release

Icelandair Orders additional Zonal Drying™ System for 3 Boeing 757-200 Aircraft.

Nyköping, Sweden, January 22, 2008, – Icelandair has placed an additional order with CTT Systems for the Zonal Drying™ System to be installed in three Boeing 757-200 aircraft. The systems, which eliminate condensation in the aircraft, are scheduled for installation during fall/winter 2008/2009.

“Icelandair is one of our first and most valuable customers and they have been using our systems since 2002 in their B757 operation. With this order Icelandair have now our system in their entire owned or long-term leased B757 passenger aircraft which proves the trust Icelandair have in our product” says Ulf Liljenberg VP Sales & Marketing, CTT Systems. “We are very pleased to get this additional order from Icelandair which shows the satisfaction with the system from our existing customers” continues Ulf Liljenberg.

By eliminating condensation in the aircraft both operational and maintenance costs will be lowered through:

- lowered fuel consumption (i.e. lower aircraft weight due to elimination of accumulated water),
- improved operational reliability (i.e. less corrective maintenance)
- consistent insulation performance (i.e. water reduces insulation performance),

Further, the aircraft residual value will be protected or even improved due to reduced corrosive impact over the years. Reduced fuel burn (due to lowered aircraft weight) also has a positive impact on the environment.

CTT's Zonal Drying™ System has been selected for the new B787 “Dreamliner” and CTT's humidifiers are options in crew rest compartments and on flight deck. The A380 offers CTT's humidifiers as option in crew rest compartments.

CTT provides systems for humidity control in aircraft. CTT Systems' offers the Zonal Drying™ System, and the Cair™ System. The Zonal Drying™ System eliminates condensation on the aircraft structure and is installed in many aircraft in use today. The Cair™ System provides humidification of the extremely dry first and business class cabins without condensation in long haul aircraft. CTT's Customers include Boeing, Airbus and many airlines, along with partnerships with Lufthansa Technik. CTT Systems AB is located in Nyköping, Sweden and listed on the Stockholm stock exchange.
