

## Press Release

### **CTT Systems AB receives order from Jet Aviation on Cair™ system for one A320 VIP aircraft**

**Nyköping, Sweden, January 26, 2006**, – Jet Aviation AG, based in Basel Switzerland, has ordered CTT Cair™ System to be installed in one Airbus A320 VIP aircraft. The end customer is a middle-east company and the installation will be done during spring/summer 2006.

Cair™ is focused on the passengers' health and comfort by providing humidification of the extremely dry aircraft cabins without condensation. Cair™ gives a pleasant relative humidity of 25%, compared to 3-5% without, for the passengers, thereby reducing dry air related problems (e.g. fatigue, jet-lag, red eyes, dry skin, spread of virus diseases).

“We are happy to once again announce an order from the VIP interiors specialist Jet Aviation, which we have done several aircraft together with before, and this time it is with even more excitement as it is the first time we will deliver system to the A320 series VIP aircraft, says Torbjörn Johansson, President of CTT Systems.

The Cair™ system is based on evaporative cooling technology. Besides being extremely energy efficient, Cair™ uses a method that effectively precludes the transfer of bacteria within the aircraft. The dual-purpose system increases humidity for greater comfort and incorporates the Zonal Drying™ System to counter condensation problems.

CTT's Zonal Drying™ System has been selected as standard for the new B787 “Dreamliner” and CTT's humidifiers are options in crew rest compartments and on flight deck. The A380 offers CTT's humidifiers as option in crew rest compartments.
