## PRESS RELEASE

### **CTT Systems AB gets orders from Jet Aviation on Cair™ system for two B737 BBJ VIP aircraft.**

*Jet Aviation to enhance cabin comfort on VIP flights with CTT's humidification technology*

**Nyköping, January 14, 2005**— Jet Aviation AG, based in Basel Switzerland, has ordered CTT Cair™ System – to be installed in two (2) Boeing B737 BBJ VIP aircraft. The system will provide a comfortable humidity level of minimum 20% throughout the entire cabin, at the same time as condensation will be prevented by distributing dry air from the Zonal Drying™ System between the cabin and the aircraft skin.

The humidification system addresses the problems associated with dry air in first and business class cabins as well as VIP aircraft cabins by raising the relative humidity levels, thereby providing healthier cabin air quality and better travelling comfort for passengers and crew.

“We are glad to announce Jet Aviation’s decision to install our humidification system in order to improve cabin comfort,” said Torbjörn Johansson, President of CTT Systems. “Our technology is today world leading and in particular within the VIP aircraft segment.”

The Cair™ is based on evaporative cooling technology, which has been tested to efficiently provide humidity safely throughout the aircraft. The Cair™ System is the only humidification system to provide cabin humidification without causing dangerous condensation, which can cause “rain in the plane”.

CTT provides systems for humidity control in aircraft. CTT Systems' offers the Zonal Drying™ System, and the Cair™ System. The Zonal Drying™ System eliminates condensation on the aircraft structure and is installed in more than 160 aircraft in use today. The Cair™ System provides humidification of the extremely dry first and business class cabins without condensation in long haul aircraft. CTT's customers include: Lufthansa, KLM, Swiss, Austrian, Sterling, Icelandair, Air Berlin, Transavia, Martinair etc. CTT also work with Boeing, Airbus, Bombardier along with partnerships with Lufthansa Technik and Hamilton Sundstrand. CTT Systems AB is located in Nyköping, Sweden and listed on the O-list of Stockholm stock exchange.
