

Press Release

CTT Systems AB strengthens its sales and marketing organization.

Nyköping, May 6, 2011. – With the return of Ulf Liljenberg, VP Sales & Marketing, to aircraft leasing and asset management after eight very successful years with CTT Systems AB, the company's Board has taken the opportunity to strengthen its international sales and marketing organization.

With effect from the 1st June, Peter Landquist, until now VP Customer Support, becomes VP Sales, Marketing and Customer Support. Peter is well-known and respected amongst CTT's growing airline and corporate customer base. He will report directly to long-time President, Torbjörn Johansson, who will add to his responsibilities with closer communications activities in collaboration with Peter. This top-level liaison with global media underlines the importance CTT places on product promotion in all its forms.

Commenting on the new organization, Torbjörn Johansson said: 'We owe a great debt of gratitude to Ulf for his tireless dedication over nearly a decade in consistently increasing both our sales on an annual basis and positioning CTT as 'Number One' in our specialist fields of Zonal Drying and Cair humidification systems, worldwide. We shall miss him and sincerely wish him well as he returns to his previous discipline - one which will ensure a continued relationship with CTT.'

The Cair system is based on evaporative cooling technology and uses a method that effectively precludes the transfer of bacteria within the aircraft. The dual-purpose system increases humidity for greater comfort and incorporates the Zonal Drying system to counter condensation problems.

CTT's Zonal Drying system has been selected for the new B787 'Dreamliner' and CTT's humidifiers are options in crew rest compartments and on the flight deck.

The A380 offers CTT's humidifiers as an option in crew rest compartments and Lufthansa has already specified Cair for its A380 First Class cabins. CTT will also supply both Zonal Drying and Cair systems for A350s as options.

CTT's products Zonal Drying™, Cair™, Flight Deck and Crew Humidifier are standard or optional equipment on Boeing B787, Airbus A350 and A380. CTT has today more than 400 systems installed in more than 30 airlines worldwide. CTT has now 16 years of operating experience on the Zonal Drying™ system plus 10 years on Cair™ and Crew Humidifier systems. IATAs report on fuel-saving measures is now including Zonal Drying™ as one of the few available fuel-saving systems for retrofitting.
