

## Press Release

### **CTT Systems AB receives order from PATS Aircraft Systems on the Cair™ system for one VVIP BBJ3 narrow body aircraft**

**Nyköping April 4, 2012**, – PATS Aircraft Systems based in Georgetown USA, has ordered a CTT Cair™ System to be installed, during autumn 2012, in one VVIP BBJ3 narrow body aircraft. PATS Aircraft Systems is a major completion center offering top quality cabin outfitting and associated services for Boeing BBJ, BBJ2 & BBJ3 narrow bodied aircraft.

"We are very pleased to work with CTT System for the first time in our new completions project on a VVIP BBJ3 narrow body aircraft. We are delighted that this system will offer supreme comfort for our customer and we recognize the added value of the Cair™ system for PATS Aircraft System VIP customers " says Joseph Smith, Engineering Manager BBJ & Hanger Operations Programs.

"This is the first order we have won from PATS Aircraft System and we are delighted to be able to work with them on this new BBJ3 aircraft" says Peter Landquist, Vice President Sales & Marketing of CTT Systems.

Cair™ is focused on the passengers' health and comfort by providing humidification of the extremely dry aircraft cabins without causing condensation. Cair™ gives a pleasant relative humidity of around 20%, compared to 3-5% without, for the passengers, thereby reducing dry air related problems (e.g. fatigue, jet-lag, red eyes, dry skin, spread of virus diseases).

The Cair™ system is based on evaporative cooling technology and uses a method that effectively precludes the transfer of bacteria within the aircraft. The dual-purpose system increases humidity for greater comfort and incorporates the Zonal Drying™ System to counter condensation problems.

CTT's Zonal Drying™ System has been selected as basic equipment for the new B787 "Dreamliner" and CTT's humidifiers are options in crew rest compartments and on the flight deck. The A380 offers CTT's humidifiers as option in crew rest compartments. CTT will also supply the Zonal Drying™ system and the Cair™ system for the A350 aircraft, as options.

---

CTT's products Zonal Drying™, Cair™, Flight Deck and Crew Humidifier are standard or optional equipment on Boeing B787, Airbus A350 and A380. CTT has today more than 400 systems installed in more than 30 airlines worldwide. CTT has now 18 years of operating experience on the Zonal Drying™ system plus 12 years on Cair™ and Crew Humidifier systems. IATAs report on fuel-saving measures is now including Zonal Drying™ as one of the few available fuel-saving systems for retrofitting.
