

**Press Release**

## **CTT Systems' Zonal Drying™ Systems to be installed in Continental Airlines Boeing 757 fleet**

**Nyköping, Sweden, October 6, 2006**, – CTT Systems today announced that Continental Airlines (NYSE: CAL) has placed an order for 41 Zonal Drying™ Systems to be installed in Continental's B757-200 aircraft. The systems, which eliminate condensation in the aircraft, are scheduled for installation beginning October 2006.

"Continental Airlines is among the largest airlines in the world and our first airline customer in USA which makes this order one of the most important for us," comments CTT's President Torbjörn Johansson on today's order. "The various benefits with our system such as reduced fuel burn and less corrosion are important factors for airlines to stay competitive and we are very proud that Continental Airlines decided to select our system," continues Torbjörn Johansson

By eliminating condensation in the aircraft both operational and maintenance costs will be lowered through:

- lowered fuel consumption (i.e. lower aircraft weight due to elimination of accumulated water),
- improved operational reliability (i.e. less corrective maintenance)
- consistent insulation performance (i.e. water reduces insulation performance),

Further, the aircraft residual value will be protected or even improved due to reduced corrosive impact over the years. Reduced fuel burn (due to lowered aircraft weight) also has a positive impact on the environment.

CTT's Zonal Drying™ System has been selected as standard for the new B787 "Dreamliner" and CTT's humidifiers are options in crew rest compartments and on flight deck. The A380 offers CTT's humidifiers as option in crew rest compartments.

CTT provides systems for humidity control in aircraft. CTT Systems' offers the Zonal Drying™ System, and the Cair™ System. The Zonal Drying™ System eliminates condensation on the aircraft structure and is installed in many aircraft in use today. The Cair™ System provides humidification of the extremely dry first and business class cabins without condensation in long haul aircraft. CTT's Customers include Boeing, Airbus, Bombardier and many airlines, along with partnerships with Lufthansa Technik. CTT Systems AB is located in Nyköping, Sweden and listed on the O-list of Stockholm stock exchange.
