CTT Systems receives AMAC Cair™ VIP Order for one Boeing BBJ 747-8 and one Airbus ACJ320neo

CTT SYSTEMS AB ("CTT"), the market leader of aircraft humidity control systems, announces Cair™ VIP Inflight Humidification order from AMAC for one Boeing BBJ 747-8 and one Airbus ACJ320neo VIP aircraft. Both VIP aircraft will feature increased humidity in the entire VIP aircraft cabin, which requires eight respectively two humidifiers. These two VIP awards are CTTs 87th and 88th for Airbus ACJs/Boeing BBJs. CTT will deliver to AMAC in Q3 and Q4 2018.

"We are honoured for this prestigious AMAC award," says Peter Landquist, Vice President Sales & Marketing of CTT Systems. "This will be our seventh BBJ 747-8 and our very first ACJneo."

AMAC Aerospace is very pleased to work with CTT. Cabin humidification is a common request from our VIP clients that value good health, wellbeing and feeling at ease during and after flight.

Cair™ VIP Inflight Humidification ("IFH") improves wellbeing on long-haul flights by maintaining humidity in the human comfort zone. With Relative Humidity at ground-like levels the human body and its membranes do not suffer from quick de-hydration; as otherwise is the case in an extremely dry cabin. The Cair™ VIP IFH system generates a relative humidity of approx. 20%, compared to 3-5% without humidifiers. The higher humidity reduces dry air related problems (e.g. fatigue, jet-lag, red eyes, dry skin, spread of virus diseases). The CTT IFH system utilizes evaporative cooling technology that effectively precludes the transfer of bacteria and improves air quality by reducing particles in the cabin air. The Cair™ VIP IFH system offers anti-condensation protection.

About CTT SYSTEMS

CTT Systems is the market leading provider of humidity control products in aircraft, including moisture control systems to prevent fuselage condensation, and inflight humidifiers for crew and passenger well-being. All products are available for retrofit installations and line-fit on Airbus A380, A350, Boeing 787 and 777X. The crew humidifier is standard equipment in a crew rest compartment on Boeing 787 and standalone option in the crew rest compartment on A380, A350XWB and B777X. The flight deck humidifier is SFE listed on Airbus A350XWB, Boeing 787 and Boeing 777X. Cair™ inflight humidification (IFH) is SFE listed for First/Business Class on A350XWB (Zone 1-3) and Boeing 777X (Zone 1 and 2). The Zonal Drying™ system is basic equipment in all Boeing 787s and optional for the Boeing Next-Generation 737-800 and Airbus A350. Also visit: www.ctt.se
